

Integrated Weed Control Project – Biological Control Agent Request Form –

If you would like to be placed on a list to have biological control agents released on your land, please fill out this form in as much detail as possible and return it to WSU King County Extension. Biocontrol agents are best released in large infestations without disturbance or herbicide/ insecticide usage. The presence of livestock is fine. Biological control agents are provided at no cost to the landowner. For more information please go to <http://invasives.wsu.edu/index.htm>

Mail forms to: Jennifer Andreas, Project Director
200 Mill Ave S. Ste 100, Renton WA 98057
jennifer.andreas@kingcounty.gov (206) 205-3135

Cyphocleonus achates, a root-mining weevil of diffuse and spotted knapweed.

Name: _____ Phone: (H) _____ (W) _____

Address: _____

Type of weed: _____ # of infested acres: _____

Best time to contact you: _____

I understand that I am receiving a **free** service from WSU Extension and may not receive insects if they are unavailable or the site is considered inappropriate. I also agree to allow representatives of the Integrated Weed Control Project (IWCP) to access the site for approximately seven years for monitoring and collection purposes. IWCP representatives will be in contact before site visits. Further, I certify that I am the landowner or land manager of the requested release area.

Signature: _____ Date: _____

***Please draw a map below or on the back of this page and/or provide directions to the weed infestation site. You will be contacted by telephone before a release is made. ***
